This book is controversial because it attacks a system that has been around for a hundred or more years. It stings the male ego. The book is provoking, and it attacks the foundation of our society's hypocrisy, especially attacks the relationship to woman. It follows after the authors first novel, Spacestation, ARX, that shows a way, in the future, for fulfilling the males sexual needs. This is a harasher book; not a men are from Venus, women are from Pluto. Its a tongue-in-cheek dialogue that every man will understand. We say it with every breath we breathe; We cant live with them, and yet we cant live without them. But we wish we could find a way to live without them for just a while longer. I know the humor of it all will show through because as males, we have all been there in some way or other. For Males Only is a manual for men [advice to men on methods to avoid relationships with women]. The result and reward for following the program as outlined is to either make more money or to end up keeping the money rather than spending a lot of time just winning and dining. The advice given will most definitely serve its purpose if followed religiously. This advice (if you will) is no means meant to be a guide on how to avoid women completely; however, in some cases, you may want to. Ex-wives, goldiggers (unless she's digging gold for you), and neurotics should be taken off your list of potential dating material even if she does insist on picking up the tab or meeting you half way. In other words, its your way or no way. This indeed is a must-have for any library particularly yours.

Hawaii is the only known place in Oceania where the people practiced a “pure” form of fishpond aquaculture. In contrast to the rest of the Pacific, Hawaiian fishponds evolved into a unique and sophisticated aquacultural practice. Nowhere else is found either the variety of fishpond types or the quantity of fishpond remains that are found in Hawaii. Over the past three decades, Hawai’i has experienced a cultural renaissance and a strong resurgence in all aspects of native Hawaiian culture. Since 1994 a small but steady effort spawned traditional fishpond restoration and fishpond culture projects on Molokai. The desire to put these historic and cultural treasures back to productive use again, and the availability of federal and state funding for agriculture and economic diversification, created a regeneration of fishpond interest and development on the island.
