Smart Hiring: A Guide for the Dental Office The need for informed analyses of health policy is now greater than ever. The twelve essays in this volume show that public debates routinely bypass complex ethical, sociocultural, historical, and political questions about how we should address ideals of justice and equality in health care. Integrating perspectives from the humanities, social sciences, medicine, and public health, this volume illuminates the relationships between justice and health inequalities and how scholars approach questions of justice. Understanding Health Inequalities and Justice explores three questions: How do scholars approach questions of justice? How do justice considerations inform health inequalities research? General principles have emerged to guide professionals conducting forensic mental health assessment. Forensic Mental Health Assessment: A Casebook illustrates these principles and provides expert guidance on how to approach a forensic mental health assessment.

Ethics and Law in Dental Hygiene - E-Book The purpose of this research study was to identify the strengths and limitations of the current Minnesota collaborative agreement (Statute 150A.10 subd. 1a “Limited Authorization for Dental Hygienists”) in addressing the oral health needs of underserved and underserved Minnesotans. Through the identification of needs and gaps in the collaborative agreement infrastructure, this research can inform and provide suggested guidelines for quality measures and policy recommendations. Data for this qualitative research study was collected by interviewing eight Collaborative Practice Dental Hygienists and nine Collaborative Dental Hygiene Practice Advisory Committee Members. An in-depth interview guide, containing 17 interview questions, was utilized for both groups of participants to identify strengths, limitations, and possible changes that need to be made to the collaborative agreement statute and for direct access infrastructure in Minnesota. The research found that there are many benefits to practicing with a collaborative agreement, such as providing opportunities for underserved populations and the dental hygiene profession. However, many barriers were identified that impede the potential opportunities, namely lack of awareness and education regarding collaborative practice among the dental profession, difficulty finding dentists to sign a collaborative agreement, and few referral sources. Many potential changes to the statute and collaborative agreement infrastructure were identified and presented as a means to improve the oral health of underserved and underserved Minnesotans.
